Compressed air condensate management

SEPREMIUM 130 now available!

The SEPREMIUM 130 is designed for compressed air applications up to 130 CFM and offers the same separation options and performance as the other models in the SEPREMIUM range.

The SEPREMIUM 130 offers the following features:

- Compressor capacity up to 130 CFM
- **35% More adsorption capacity versus the SEPREMIUM 125.**
- Separation of all known compressor lubricants.
- All types of condensate drains may be applied
- Simple and quick element replacement procedure.
- Small foot print.
- Test bottle included.
- Brass threaded inlets, ensuring a secure installation.
Hose barbs are included!
- Wall mounting bracket available.

Small foot print

15,16"

Routine testing feature included

Wall mounting bracket

THE CONDENSATE MANAGEMENT SPECIALIST

'INDUSTRY 4.0' - development update

JORC will be exhibiting at the **Hannover Messe in Germany from April 1st to April 5th**. The Hannover Messe is still the largest industrial exhibition in the world.

Like previous editions JORC chooses this show to launch several new products and product concepts.

We will be demonstrating our latest developments with regard to the Industry 4.0 integration into our products. Come and see a live demonstration of the UPC-UA product interaction and the dashboard system information it can provide you! This new system will offer you all kinds of performance data - including maintenance warning signals that trigger revenue generating opportunities and much more.

We will also be exhibiting our latest oil/water separator developments and new drain concepts.

Follow us on [LinkedIn](#) for more information as we approach the Hannover Messe. We can offer you free entry tickets, just send us an e-mail with your request to info@jorc.com. We look forward to seeing you!

HANNOVER MESSE 2019, 01 - 05 April

JORC's hall and stand number:

HALL 26 Stand D56

Sneak product preview!

A new electronic level sensing drain for extremely contaminated applications.

A new pneumatic level sensing drain with a draining capacity of 2600 gallons per hour (this is a limited maximum).

A new internal zero air loss filter drain!

See you soon!

JORC - a supporter of sports!

JORC sponsors sport clubs and sporting individuals.

Activities and events around the world carry the JORC logo as we support them at both amateur and professional level.

Message from Sales (2018 reflection)

What a year we had!

JORC recorded a 15% growth versus 2017 and as if the growth factor wasn't enough to keep ourselves busy - we also:

- Productionised the digital sight-port feature to the SMART-GUARD.
- Got the SMART-GUARD-MINI UL certified.
- Certified the SEPREMIUM oil/water separators to the latest DIBt protocol.
- Introduced the new DISTRIBUTOR.
- Finalised the tooling on the new SEPREMIUM 130
- Were successfully audited again for our ISO-9001 - 2015 certificate.
- Exhibited at trade shows worldwide!
- Designed the SMART-GUARD-HP-1750 (1750 PSI zero air loss drain).
- *"Travelled each and every highway!"*

Ticks of the Trade

Question:

Are the JORC drains designed with stainless steel internals?

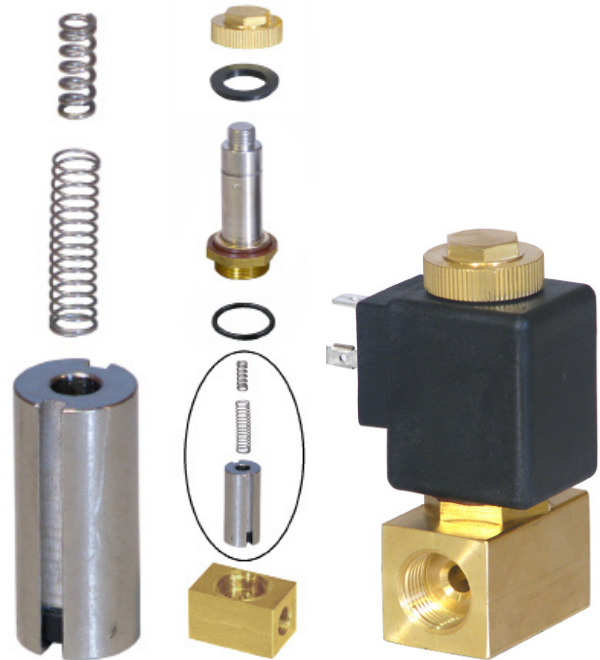

Answer:

Yes!

JORC products are designed to perform in very contaminated compressed air applications.

High quality stainless steel is selected and applied in all JORC drains (timer controlled and level sensing models). Combined with FPM seals, the direct acting valve construction outperforms any other solenoid valve design in condensate draining applications.

Particularly demanding applications are when ambient/media temperatures are very low or extremely high. These extremes, combined with a high level of condensate debris, makes JORC's direct acting valve construction the most reliable choice, based on customer feedback.

TIMES QUOTE

You haven't lost if you get knocked down, you lose if you stay down.

JORC Industrial is a global condensate management specialist of Dutch origin offering condensate drains, oil/water separators and air saving equipment to distributors, dealers and OEM's in more than 100 countries. JORC Industrial is dedicated to setting the standard in helping its customers manage their condensate management requirements.

JORC products

OPTIMUM, OPTIMUM-COMBO, OPTIMUM-QUICK-SET, D-LUX, EAD, DISTRIBUTOR, LOCATOR, LOCATOR-EV, AIR-SAVER, MAG-11, MINI-MAG, SEPREMIUM, TEC-11, TEC-44, POD-TD, SMART-GUARD, SMART-GUARD MINI, PURO-CT, SMART-GUARD-HP-S-7000

JORC products no longer available:

SMART GUARD PRO, OPTIMUM, COMBO, COMBO-QUICK-SET, XP, TEC-22, TEC-33, ENVIRO, PURO, PURO MINI, SEPREMIUM 125, PURO MIDI, PURO GRAND, PURO GRAND XTENDER, PURO DISTRIBUTOR, TEC-55, WARNER
