Description: Condensate separating system

Types: **PURO-CT**

- * Condensate treatment is an important element of any compressed air system. The PURO-CT oil/water separator complies with strict environmental requirements.
- * The PURO-CT uses a proven and well-developed system which does not depend on complicated climate zone calculations or a complicated selection criteria.
- * Providing minimum maintenance is carried out, the performance of the PURO-CT will typically achieve an output of < 10 ppm.
- * The PURO-CT does not have large settling tanks or reservoirs that hold the condensate for long periods and which can encourage harmful bacteria growth.
- * The PURO-CT units are carefully tested on water tightness.
- * The PURO-CT is totally recyclable.
- * The PURO-CT range of oil/water separators helps you comply with **EPA** (USA Environmental Protection Agency) regulations.
