

## VALVE QUESTIONNAIRE

**Application data**

Fluid controlled.....  
Optional additives or impurities in fluid.....  
Maximum fluid temperature.....  
Viscosity.....  
Minimum fluid temperature.....  
Operating pressure.....psi maximum,.....psi minimum,.....psi normal  
Flow capacity.....  
Ambient temperature.....maximum,.....minimum

**Valve design**

Ports (NPT, G/BSP, etc.).....  
Orifice size.....  
Valve body material.....  
Mode of operation  
*(please choose)*       2/2 NC (closed when de-energized)  
                                  2/2 NO (open when de-energized)  
                                  3/2 NC (closed when de-energized)  
                                  3/2 NO (open when de-energized)

Supply voltage (AC,DC, Hz, etc.).....  
Coil energized  
*(please choose)*       Permanently  
                                  Intermittently, Time ON.....Time OFF.....

Environment description (dry, moist, dusty, open air, etc.)  
.....  
.....  
.....  
.....  
.....  
.....
